### Introduction

Thanks for choosing TunesKit for Windows!

TunesKit for Windows is the first and unique iTunes DRM media converter tool to remove DRM protection from iTunes movie rentals and purchases by changing the DRM-ed M4V file extension to DRM-free MP4 format on Windows with original video quality, 5.1 audio tracks and subtitles retained.

By converting DRM locked iTunes movies with TunesKit for Windows, you are free to enjoy any iTunes movie rentals and purchases on various popular mobile devices and media players such as Samsung Galaxy Note, HTC, Nokia, Nexus, iPhone, iPad, VCL, WMP, etc.

### Key Features

- ✓ Remove DRM protection from iTunes movies, TV shows, music videos
- ✓ Convert both iTunes M4V movie purchase and rentals
- ✓ Customize the output audio tracks, bit rates, codec, etc.
- ✓ Keep 5.1 surrounding audio tracks, closed captions, subtitles
- ✓ Keep the meta data
- ✓ Support batch conversion
- ✓ Convert 720P/1080P HD videos without quality loss

### System Requirements

- ✓ Mac OS X 10.8.x, 10.9.x, 10.10.x, 10.11.x
- ✓ iTunes 12.x
- ✓ At least 512M physical RAM
- ✓ 1G Hz Intel processor or above
- ✓ 1024x768 resolution display or higher

## Installation & Register

- [Install TunesKit for Windows](#)
- [Register TunesKit for Windows](#)

### Install TunesKit for Windows

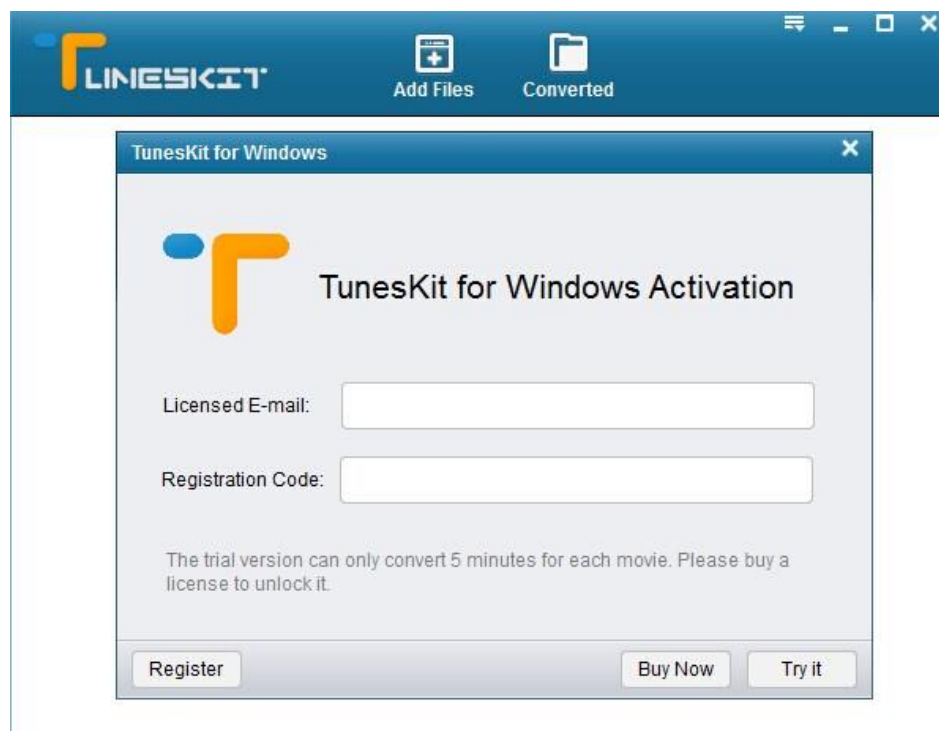

To install this product, please do as the following steps:

1. Download the installation package of [TunesKit for Windows](#) from product page.
2. Double click the installation file TunesKit for Windows.exe to start installing it on your PC.
3. Follow the instructions to finish installation.
4. When you see a window where there is an icon of TunesKit for Windows, drag and drop the icon onto the desktop. Then you can just run the program from the desktop icon.

### Register TunesKit for Windows

Step 1. Run TunesKit for Windows. First you should click the “register” option in the menu of TunesKit interface. Then a registration window will pop up.

Step 2. Fill the input blanks with Registration Name and Code you received from TunesKit to register it to a full version. You can use Command + C to copy and Command + V to paste in the window.

### Main Interface

After launching TunesKit for Windows, you will see the main interface like this:

## Converting Interface

After clicking the Convert button, you'll see the converting interface like this:

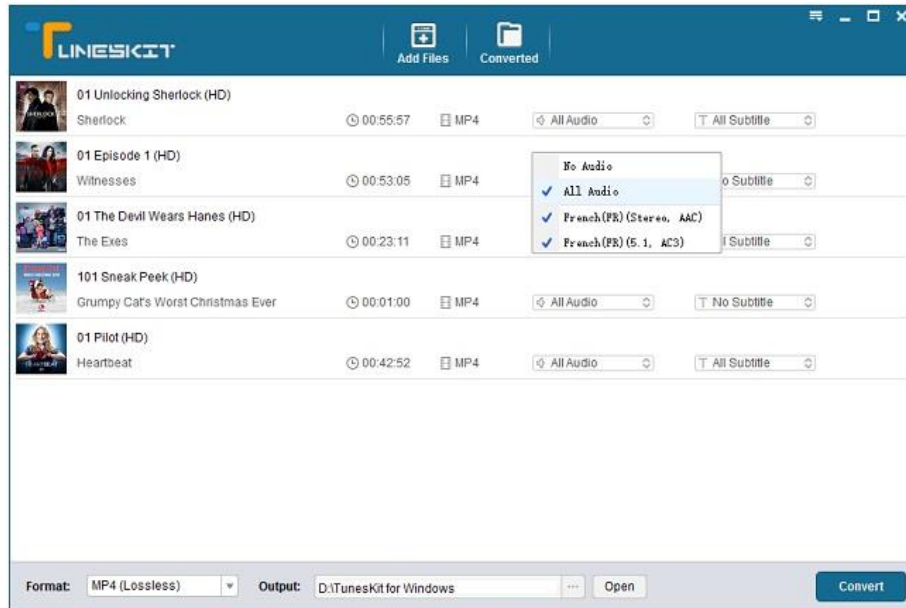

## Settings Interface

Before conversion, you can adjust the output formats and path by clicking the Format and Output option of the program:

You can also select the subtitles and audio tracks for each iTunes movie by clicking the specific icon next to the movie name:

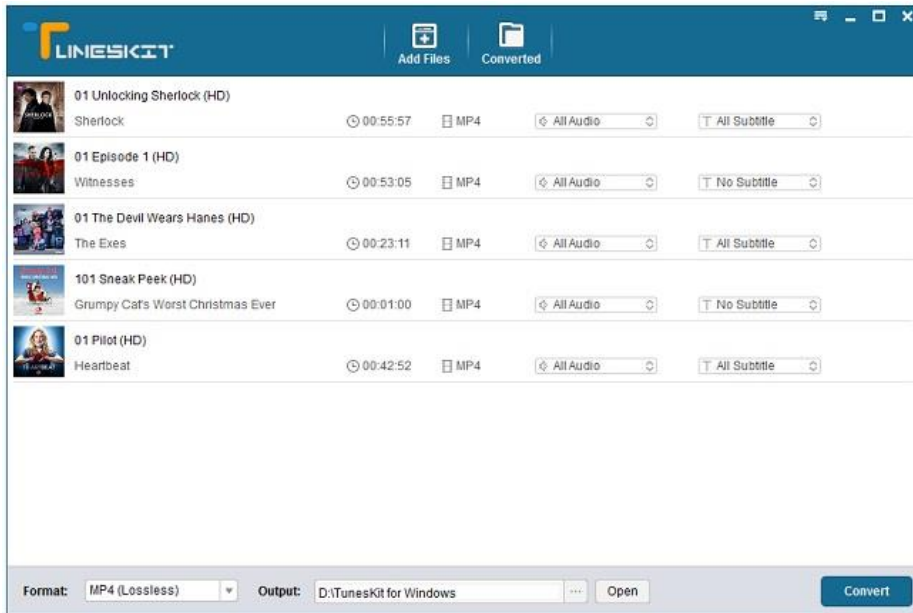

## Tutorials

- [Add iTunes Video Files](#)
- [Customize Output Settings](#)
- [Convert iTunes Videos](#)

### Add iTunes Video Files

Click the Add Files button to import iTunes video files to TunesKit. You can also drag and drop the movies into the converter.

## Customize Output Settings

Click the Format button to select the output media format as you like and customize the output folder by clicking Output Path.

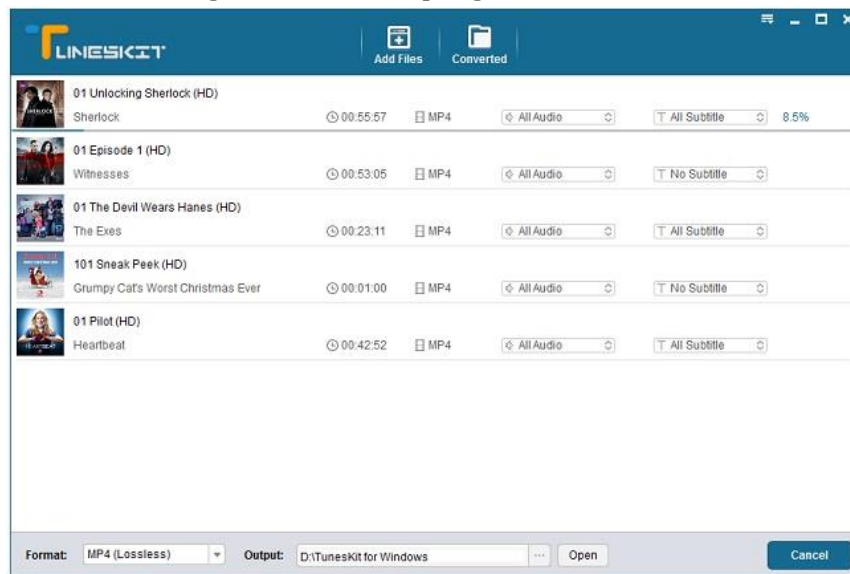

### Tips:

1. If you don't change the output path, the converted files will be saved in Converted default folder;
2. In the popup window, please customize the output directory and then click Open Directory button;
3. You can also customize the output settings, like bit rate, channel, as you like.

## Convert iTunes Videos

After adding the iTunes video files and customizing output settings, just click the Convert button to start converting iTunes M4V videos to MP4 or other common formats. At the same time, iTunes will be launched again if it has been closed after started together with the program.
