## Questions From Our Customer

**Q:** "Hi, I recently bought some iTunes movies on my iPad Air. But I also want to transfer these movies to my Windows computer and watch them with Windows Media Player 12. You know, iTunes is not a perfect choice to watch movies. Can TunesKit help me convert iTunes DRMed M4V videos to Windows Media Player formats?" - *From Jon William*

**A:** Yes. Of course. As we all know, the movies we purchased from iTunes movie store are totally encrypted by Apple's Fairplay DRM technology. This annoying DRM copy protection is the barrier for watching the iTunes protected videos with other media players like [VLC](#) or other mobile devices like [Samsung Galaxy](#).

However, **TunesKit DRM Removal products** can easily resolve this problem. With [TunesKit iTunes DRM Removal for Mac](#), we can easily bypass the Fairplay DRM protection and liberate all your iTunes movies, TV shows and music videos, both purchased and rented. It can convert iTunes protected M4V videos to unDRM MP4 format with lossless quality. All data contains in the original iTunes movies can be preserved, including the **multi-language subtitles, audio tracks** and even the **AC3 dolby 5.1 surround sound** can be kept 100%. And the conversion speed is the fastest among all DRM removal applications. It can reach up to **50X faster** than other similar tools.

But the Windows version is not released yet. So as to Jon's problem, you have to resolve it on a Mac computer with TunesKit for Mac currently.
