

## How to Steam iTunes Movies/TV Shows to Chromecast

Posted by Fatima Cook on 08/15/2014 10:26:01 AM.

### How Chromecast Works?

**Chromecast** is media player device developed by Google. It's a tiny stick with tiny price. And it works like [Roku](#) or Apple TV. Just plug it into the TV's HDMI port, then use a smart phone or computer to control it remotely. With a Chromecast, you can enjoy many video channels on your TV set or hometheater system easily, like Youtube, Netflix, Hulu Plus, the Google Play Store or other services. You can also stream all content on your smart phone or computer to the Chromecast then watch them on TV.

### Can We Stream iTunes Library Content To Chromecast?

As a movie addict, I prefer to buy or rent movies/TV shows from iTunes store, because of its high quality and multiple choices. But can I stream all my iTunes library content to Chromecast? It's much cheaper than Apple TV.

However, all content downloaded in iTunes library are copy protected by Fairplay DRM protection. It prevents us using the iTunes library content on other devices except Apple's. But if we can liberate these content and break the DRM protection with an [iTunes DRM removal tool](#), it's free to steam the iTunes movies and TV shows to Chromecast by then.

**TunesKit for Mac** is the best and fastest iTunes DRM removal application I can find currently. It can actually strip the iTunes DRM protection from iTunes purchased and rented movies/TV shows and convert iTunes M4V to MP4 format with 20x faster speed and 100% preserved quality. All subtitles, multi-language audio tracks and even the fantastic AC3 5.1 surround will be retained well in the output MP4 video. (The Windows version will be coming soon...)

## Part 1. How to Bypass the iTunes DRM Protection With TunesKit

With the intuitive interface of TunesKit for Mac, you can easily handle this Mac DRM removal application with simple clicks.

### Step 1. Add iTunes movies you want to bypass DRM from

In most case, we can add the iTunes movies by clicking "Add Files" icon, then TunesKit will direct you to iTunes library automatically. But for some users, they will store the iTunes downloaded videos to other directory or external driver, then it had to drag and drop the iTunes movies to TunesKit by instead.

Step 2. Start removing iTunes DRM protection.

Click "Convert" button to start the M4V to MP4 conversion. You can also preset the audio tracks, subtitles before the conversion by highlight the movie, and clicking the "Settings" icon to show the settings, and checking the one you need.

## Part 2. Stream iTunes Movies to Chromecast Via Mac OS X

Chromecast works as a digital media player, it supports most of media formats. And it also works as a powerful transmitter, so that you can stream all the movie content on your Mac computer to Chromecast, then enjoy the iTunes movie on TV set with DRM free.

### Step 1. Plug the Chromecast into your TV set via the HDMI connection.

After plugin correctly, you have to power it by a USB cable.

### Step 2. Keep the Chromecast and your Mac computer in the same WIFI.

Connect both Chromecast and the Mac computer in the same WIFI and find the Chromecast on your Mac computer.

### Step 3. Steam the converted iTunes movies to Chromecast

Now your Mac computer works like a remote controler. You can find the converted iTunes movies and play it via the Chromecast now
